Copa + Glas

HANDCRAFTED MIRRORS & LIGHTING · EST. 2021

Works of lasting beauty and significance, made by hand in East London.

MADE IN BRITAIN

EAST LONDON, ENGLAND
MADE TO ORDER

THE STUDIO

A craft studio rooted in *forty years* of making.

Copa + Glas was founded in 2021 by Anthony McCarty and Bradley McWhinney in East London. Every piece in the collection is made to order, hand-cut glass set in solid copper, formed and finished entirely in our studio.

Anthony began cutting glass aged sixteen. He has worked with glass throughout his career, from an early commission on the Saudi Arabia dome in 1983, to Hotel Café Royal's 1,000-piece copper and glass lightwell with David Chipperfield Architects. Our heritage stretches further still, drawing on the 1897 Luxfer Prism glazing tradition that shaped the architectural glass of Frank Lloyd Wright.

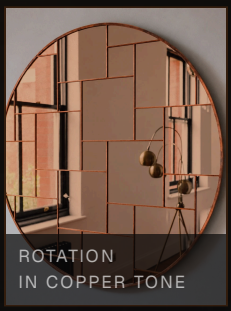

Each Copa + Glas piece is not a product off a shelf. It is a considered object, selected for its materials, designed for its setting, and made by hand to last.

THE COLLECTION · 2026

Made by hand, *one at a time.*

Our mirrors and lighting take three forms: the Studio Collection, made to order; editions, each limited to ten; and bespoke works, designed for a single client. Everything is made by hand in our East London studio.

ROTATION
IN COPPER TONE

THE MONDRIAN
MIRROR

THE FIBONACCI
MIRROR

AURA

MIRRORS · I OF IV

The Rotation
Mirror

> "Twenty-six hand-cut facets set in solid copper, rigid geometry and fragmented light held in the same breath."

The Rotation Mirror is the foundational work of the Copa + Glas collection. Its form explores the tension between the strict and the organic, a geometric framework that fractures light differently at every angle and in every room.

The Rotation is offered in the standard studio configuration of 26 silvered glass facets, hand-cut and set individually into a solid copper frame, hand-formed and finished in our East London studio.

No two pieces are identical. The hand-finishing process means each frame carries the trace of making.

DIMENSIONS	97cm diameter
MATERIALS	Solid copper · Silvered glass
FACETS	26 hand-cut panes
LEAD TIME	6–8 weeks

MIRRORS · II OF IV

The Rotation *in Copper Tone*

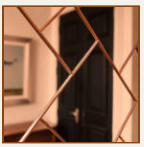

> "Twenty-six hand-cut facets of copper-toned glass, set in solid copper."

The Rotation in copper tone glass. Twenty-six facets are cut by hand and set within a frame of solid copper, itself formed by hand.

The glass is silvered with a copper tint, so reflections take on the warmth of the frame and metal and glass read as one material. The form is identical to the original Rotation; the difference is one of colour.

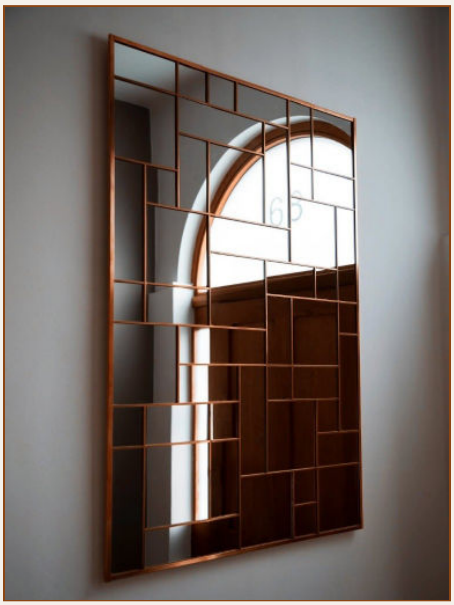

DIMENSIONS	97cm diameter
MATERIALS	Solid copper · Copper tone silvered glass
FACETS	26 hand-cut panes
LEAD TIME	6–8 weeks

MIRRORS · III OF IV

The Mondrian *Mirror*

> “Rectilinear panes in a hand-formed copper grid, an exercise in proportion and the beauty of what lies between.”

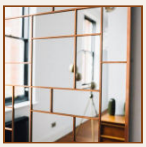

Named for its compositional kinship with the De Stijl movement, The Mondrian Mirror is built entirely from right angles. Each glass pane is cut to a precise specification and set into a copper grid that is hand-formed in the studio, the lines are never perfectly even, because they are never cast from a mould.

The result is a mirror that reads as architectural from across a room, and as quietly hand-made up close. It suits entrance halls, drawing rooms, and any space that rewards a second look.

Available in the standard studio proportion or as a bespoke commission adapted to your project.

DIMENSIONS	69.5 × 100.5cm
MATERIALS	Solid copper · Silvered glass
PANES	48 hand-cut panes
ORIENTATION	Portrait (landscape on request)
LEAD TIME	6–8 weeks

MIRRORS · IV OF IV

The Fibonacci *Mirror*

> "Spiralling golden-ratio geometry in copper and glass, the mathematics of nature made legible in a frame."

The Fibonacci Mirror traces the Fibonacci sequence in glass. Each section corresponds to a number in the spiral, stepping outward from the centre in the same proportional rhythm found in nautilus shells and sunflower seed-heads.

In copper and silvered glass, this structure becomes architectural. The mirror sits comfortably above a mantelpiece or fireplace, though it has equal presence when mounted independently on a wall.

The Fibonacci is the most recognisably narrative piece in the collection, an object with an argument, and a quiet elegance in how it makes it.

DIMENSIONS	65 × 90cm
MATERIALS	Solid copper · Silvered glass
GEOMETRY	Golden-ratio spiral
LEAD TIME	6–8 weeks

LIGHTING · I OF I

Aura
Wall Light

Born from a private commission, the Aura Wall Light began as a study of what happens when glass colour meets copper form in direct light. Each piece is specified to the room it will live in, glass finish, scale, and proportion are all adapted at commission stage.

The standard studio size is 30 × 41.5cm, though the example shown here was made at 50 × 65cm with an illuminated Corella Orange art glass centre pane. Each configuration is unique.

STANDARD SIZE	30 × 41.5cm
MATERIALS	Solid copper · Art glass

AVAILABLE GLASS FINISHES

CORELLA ORANGE

SUSSEX GREEN

CORELLA YELLOW

EDITIONS

Works in a series *of ten.*

1 of 10

WORLDWIDE · SIGNED

EDITION OF TEN

The Prairie
Mirror

In the spirit of the Prairie School art glass windows of Frank Lloyd Wright. Clear and coloured art glass in the geometric language of the Luxfer Prism, the same tradition that shaped Wright's studio windows and our own lineage as a studio.

31.5 × 91cm · Silvered & art glass

EDITION OF TEN

The Rotation
Confetti Mirror

The Rotation Mirror reinvented in refracted colour. Each of the 26 facets holds a different piece of hand-selected coloured art glass, no two pieces identically sequenced. A celebratory work in the spirit of the original.

97cm diameter · Coloured art glass

BESPOKE

Made entirely *for your project.*

Bespoke works are commissioned by private clients, interior designers, and architectural practices. We work from your brief, or develop one together. Scale, composition, glass selection, copper finish: everything is on the table.

THE PROCESS

01 **Begin a conversation**

Write to us with your project. We reply personally, typically within two working days. No automated responses, no standard rate card.

02 **Visit the studio**

By appointment in East London. Meet Anthony, handle materials, review glass samples, and walk through initial drawings before anything is confirmed.

03 **We make it**

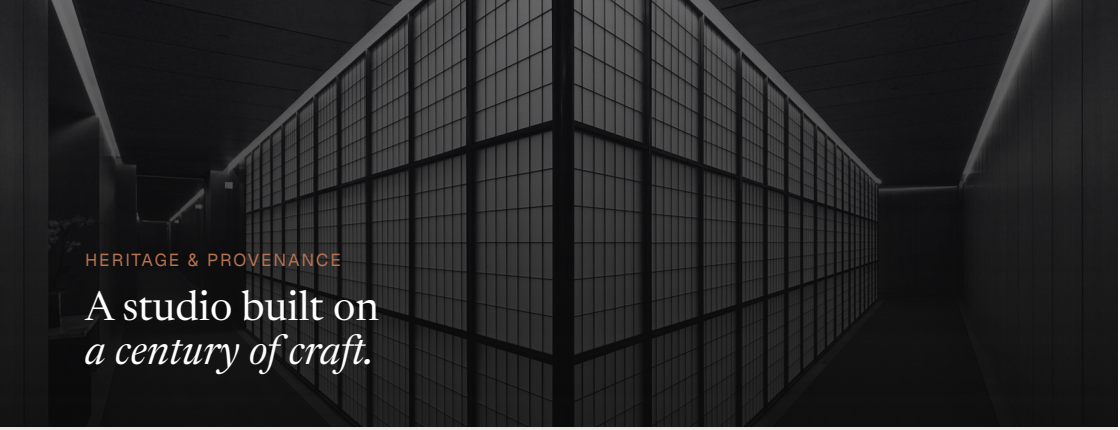

Terms confirmed in writing. Progress shared at the midpoint. A 50% deposit confirms the commission; balance before dispatch. Lead time 6–8 weeks.

BEGIN A COMMISSION

Write to us with your project brief, as much or as little detail as you have.

HERITAGE & PROVENANCE

A studio built on *a century of craft.*

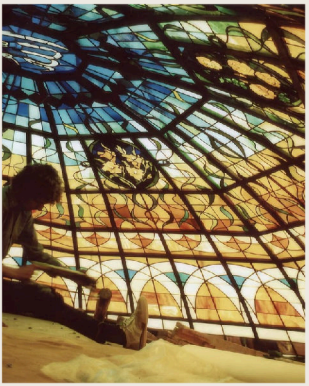

Copa + Glas draws on a lineage of British glass craft that stretches back to the Luxfer Prism Company, founded in 1897. The same material intelligence that furnished the buildings of Frank Lloyd Wright and the Victorian city now informs every piece we make.

HOTEL CAFÉ ROYAL · 2012

ARCHITECTURAL COMMISSION

1897

Luxfer Prism Co. patents prismatic glass tiles, the architectural glass tradition Copa + Glas draws from.

1983

Anthony's glass dome commission in Saudi Arabia, one of his earliest large-scale architectural works.

2012

Hotel Café Royal lightwell, 1,000+ hand-made copper and glass screens for David Chipperfield Architects.

2021

Copa + Glas founded in East London. The studio collection launches with the Rotation Mirror.

TRADE & DESIGN PROFESSIONAL PROGRAMME

Working with *interior designers.*

A dedicated programme for architects, interior designers, and trade specifiers, with preferential access, personal contact, and full specification support from the studio.

PROGRAMME BENEFITS

- **Preferential trade pricing**
  Not published. Quoted directly by the studio.
- **Named studio contact**
  One consistent person for every project and enquiry.
- **Full image library at print resolution**
  Available immediately on request for boards and presentations.
- **Bespoke specification support**
  Anthony McCarty works directly on your commission brief.
- **No minimum order**
  One piece made with the same attention as ten.
- **Worldwide white-glove delivery**
  For architectural and trade commissions.
